### Recall

### Active synchronization between your phone and app

Recru will directly dial the phone number from your phone. Incoming call will open candidate's file directly in the database of Recru.

It is possible to send messages (even in large number) from the software via your phone. Recru will add a photo of the candidate, which you have just taken with your smartphone, into the database.

### Recall is able to

Take photos of candidate's documents directly from his file

Identify the caller if he is in the RECRU database

Keep track of incoming/outcoming calls and their duration

Sending messages in large numbers

## Mobile Attendance System

## Elegant overviewing of mobile attendance

You can print out employees card with his QR code, put a tablet of a smartphone on the wall and all the internal or external employees can scan their cards and put their arrival and departure in evidence.

Recru then allows you to see the number of people at work in real time independently from the distance of an employee and work place.

You will get an automatic monthly overview about the number of each employee's hours spent at work. It will provide you to monitor the history of the whole attendance. MAS offers actualization of employees' movement at all times. **It is cheap, mobile, and flexible.** 

### MAS differentiates

Internal and external employees

Workplace location Arrival and departure time Day and night shift

MAS enables quick contact

## Safety
